Education

The Ohio State University

Columbus, OH

B.S. in Computer and Information Science (Artificial Intelligence Track), Minor in Business

Aug. 2023 – May 2027

- **Relevant Coursework:** Operations Management, Data Mining, Database Systems, Artificial Intelligence, Data Structures and Algorithms, Software Development and Design, Information Security, Marketing, Human Resources, Accounting

Experience

EDI Specialist Intern – Logistics Planning

Jun. 2026 – Aug. 2026

Fuyao Glass America Inc.

Dayton, OH

- Monitored customer **EDI orders**, forecasts, and delivery requirements using **Plex** and **Excel** for production planning.
- Analyzed forecast accuracy, delivery performance, and departmental **KPIs** to identify issues and support planning decisions.
- Coordinated shipping updates and order changes across **production, warehouse, logistics**, and customer-facing teams.
- Selected to return to Fuyao for a second internship after previously working with the Information Technology department.

Information Technology Intern

May 2025 – Aug. 2025

Fuyao Glass America Inc.

Dayton, OH

- Built **SQL queries** to extract overtime & attendance data for **Tableau dashboards** supporting workforce and HR trend monitoring.
- Automated recurring workflows to improve processing efficiency and strengthen coordination across internal teams.
- Analyzed network performance metrics and collaborated with IT teams to troubleshoot **Cisco** connectivity and system issues.

Research Assistant

Jan. 2026 – Present

University of Minnesota Twin Cities (Remote)

Minneapolis, MN

- Extracted and annotated figures, tables, and technical documentation from computer architecture and hardware resources.
- Developed structured metadata describing timing diagrams, processor architectures, and system-level design concepts.
- Collaborated with **PhD researchers in Prof. Ding's research group** to organize training data for AI-assisted technical analysis.

Student Assistant

Apr. 2024 – Apr. 2025

Recreation and Physical Activity Center, The Ohio State University

Columbus, OH

- Supported **600+ students weekly** while helping maintain smooth operations in a high-traffic university recreation environment.
- Managed facility logistics, reservations, foot-traffic data, and sales information to support daily operational decisions.

Projects (Course/Individual)

AI Customer Support Agent | *React, TypeScript, FastAPI, OpenAI API, PostgreSQL, Chroma*

Jun. 2026

- Built a **full-stack AI support chatbot** with React, TypeScript, FastAPI, and OpenAI API for multi-turn customer interactions.
- Implemented **order tracking, returns, product Q&A, and human escalation** workflows for customer service scenarios.
- Integrated **Chroma** for policy retrieval and **PostgreSQL** to store conversations, customer requests, and support records.

Pulitzer Prize Data Analysis | *R, RStudio, ggplot2, dplyr, tidyr*

Sep. 2024

- Analyzed FiveThirtyEight newspaper circulation data in **R** to evaluate circulation trends, changes, and publication outcomes.
- Cleaned and transformed data with **dplyr** and **tidyr**, resolving **20+ missing values** and inconsistent variables.
- Created histograms and scatter plots with **ggplot2** to compare circulation patterns and relationships across publications.

Spotify Music Popularity Analysis | *Python, pandas, NumPy, scikit-learn, Matplotlib*

Jan. 2026

- Conducted exploratory analysis on a large Spotify dataset to identify genre trends, audio features, and popularity patterns.
- Cleaned and structured raw data with **pandas**, removing redundant fields and selecting features for predictive modeling.
- Built and evaluated a **Linear Regression** model using train/test splits, **R²**, and **RMSE** performance metrics.

Android Logcat Debugging & Bug Reproduction | *Python, Android, ADB, Emulator*

Mar. 2026

- Configured an Android emulator and installed multiple APK builds to reproduce application bugs under controlled test conditions.
- Captured and reviewed **logcat traces** to identify runtime exceptions, stack traces, and application failures during testing.
- Reproduced a documented **K-9 Mail crash** and organized APK versions, bug reports, crash evidence, and reproduction details.

Skills

Business & Operations: Microsoft Excel, Plex, EDI, Forecast Analysis, KPI Tracking, Delivery Planning, Stakeholder Reporting

Data & Analytics: SQL, Tableau, Power BI, Python, R, Data Cleaning, ETL, Dashboard Creation, Data Visualization

Programming: JavaScript, Java, HTML/CSS

Tools & Platforms: Jira, Google Analytics, Google Workspace, Microsoft 365, PostgreSQL

Systems: Troubleshooting, Network Fundamentals, Information Security, Access Control, Workflow Automation
